# What is AUSTISM?

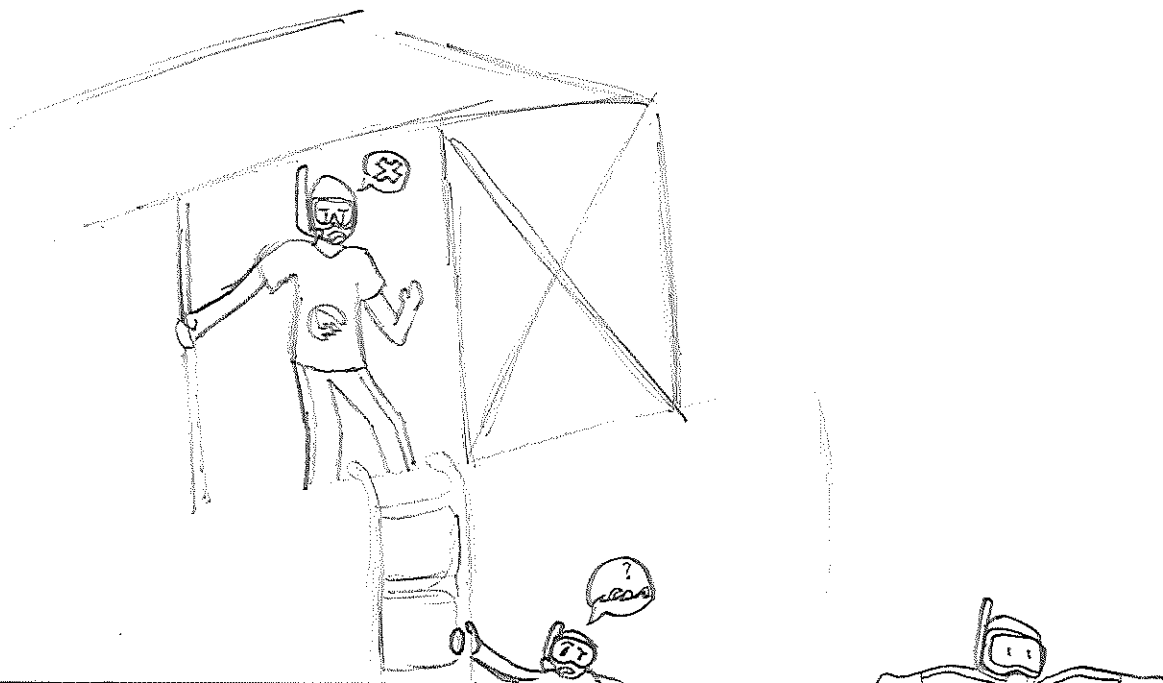

Autism is the people that how have a diffract idea and diffract thot. In 1 in 68 are the Autism people.

Autism have a problem abut interesting people, join social, hard to understand and do thing that diffract.

Sometime Autism can do thing that people do. Cashes go swimming at the beach, waking up the mitten and more thing.

Some Autism are porw. Like Autism that can speck and can't do anything. When we see 31-year-old boy or girl that make a lawn nowise or acting ward thing, that is Autism.

Some Autism have an amazing mine that people can't belief.like Thomas Edison who invented the first light bulb. Albert Einstein who discovered the gravity. And many more.

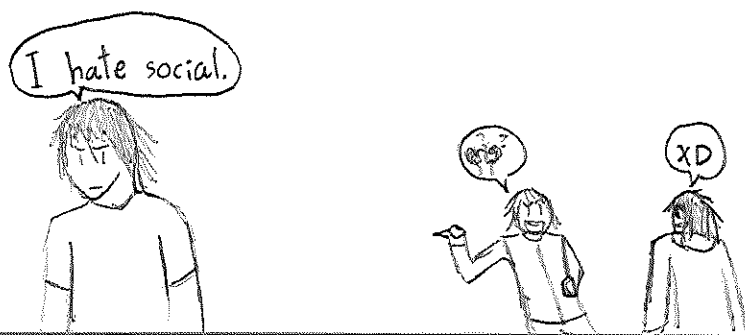

Albert Einstein

Thomas Edison

How is feel to be Autism. Autism have a pretty difficult to interact with social, some of the Autismof are nervous. Hard to understand and afraid of failure. Sometime Autism like to be alone when people want to be friends they will act scared. Sometimes Autism want to be friend but if fun is challenging difficult and end up sometime fighting or not be frand.

And that how it felt to be autism.
